

Potential HomeReady Eligible Casefiles API

The Fannie Mae Connect™ Potential HomeReady® Eligible Casefiles API automates the manual process to search and find HomeReady eligible loans. The dataset returned by the API is available in the existing Fannie Mae Connect report.

This API automates the process into your internal systems to provide accurate, daily reports on Desktop Underwriter® (DU®) casefiles that may be eligible for HomeReady.

Best of all, this automated process provides potential LLPA savings directly through internal systems. The Potential HomeReady Eligible Casefiles API saves on your level of effort and time, while increases accuracy of the data.

Benefits

- **Cost savings** – Enables users to build their own automated process to identify and monetize case-file LLPA savings
- **Operational efficiency** – Automates the daily ingestion of data from the Fannie Mae Connect report directly into your systems
- **Improved accuracy** – By automating a previously manual process, the API greatly improves Fannie Mae Connect data accuracy in your internal systems

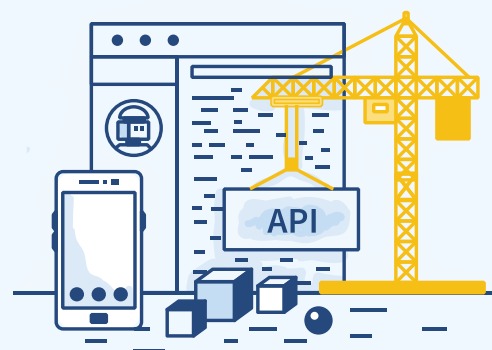

When would I use Potential HomeReady Eligible Casefiles API?

Use the API to automate the manual process of downloading and ingesting report data from Fannie Mae Connect into their Loan Origination process.

Those unfamiliar with the existing report can use the API to build an internal process to identify and process LLPA savings from Potential HomeReady Eligible Casefiles .

Key Features

- Build your own daily process to automatically identify HomeReady LLPA savings
- Eliminates manual searches and manipulation of DU casefiles for HomeReady eligible loans in Fannie Mae Connect
- Improves quality assurance with daily, automated data reconciliation
- Simple integration using API protocols and all API responses sent via comprehensive JSON file format
