

# EarlyCheck Integration Impact Memo

## EarlyCheck Enhancements

April 25, 2022

Dear Integration Partner:

A new version of EarlyCheck™ will be introduced in July that will support the ULAD 3.4 and ULDD dataset. The new version of EarlyCheck will not accept legacy loan application files in MISMO 2.3.1 or Flat File 1003 format. There will be no changes to the XIS Gateway. Users may utilize the same URL endpoints to submit files. All integrated partners should not experience any interruptions in making system-to-system calls into EarlyCheck. Please visit the [EarlyCheck page](#) for additional details.

**NOTE:** *EarlyCheck enhancements will be available in the integration test environment on May 16.*

For a complete list of the edit messages, view the EarlyCheck Edit Messages document in the Edit Messages section of the [EarlyCheck page](#) 30 days prior to each update.

For information on EarlyCheck enhancements prior to July 2022, please refer to the [Release Notes archive](#) document available on the EarlyCheck homepage.
