

Property 360 for Expense Reimbursement – Release Notes

July 26, 2022

Effective July 21, we implemented the ExPo 5.16 Release and the Property 360™ 1.12 Release. Execution of the changes in these releases will improve workflows and increase performance.

Summary:

Ticket Number	System Features and Defects
Back-End	
SFLSTSVC-75303	ETL: SMDU LMV Data Migration
SFLSTSVC-80125	Claims - P360 UI Separation of Code
SFLSTSVC -91750	Separation of Code Final Reconciliation - Claims
SFLSTSVC -91967	360UX - Date formats inconsistent on JSON file for API
Defects	
SFLSTSVC-84708	Regression - Unable to View or Download the Attachment and Not Able to Resubmit the Claim

Defect Details

Regression - Unable to View or Download the Attachment and Not Able to Resubmit the Claim

Users were unable to view/download attachments on a claim or resubmit the claim. System issue prevented users from resubmitting any claims when a line or attachment was deleted, when the same attachment was added to multiple lines, or if the claim was created from a bulk upload. This update deleted the additional attachments with same name and the issue has been resolved.
