## In Case You Missed It

Effective Date	Impacted Area	Description
July 17	UCD Phase 3A Edit Updates	<p>On July 17, UCD removed edit 3631 from UCD, as edit 3628 covers the same conditions. Edit 3628 will remain active as fatal severity with no changes.</p> <p><b>Edit 3631:</b> When Prepaid Item Type is equal to 'PrepaidInterest', Integrated Disclosure Section is required and must equal 'Prepays'.</p>
July 21	UCD Data Quality	<p>To further refine UCD data quality, the following new edit will be added to UCD as warning severity on July 21.</p> <p><b>Edit 3674:</b> When the Loan Discount Points Fee Total Percent is greater than 0, the Note Rate Percent cannot equal the Loan Price Quote Interest Rate Percent. The Loan Price Quote Interest Rate Percent should be the interest rate without any discount points applied.</p>
May 1	UCD Critical Edits - Phase 3 Implementation	<p>The UCD Phase 3 critical edits are divided into two subsets, 3A and 3B:</p> <ul style="list-style-type: none"> <li>Phase 3A edits will transition to critical/fatal on May 1, 2023.</li> <li>Phase 3B edits will transition to critical/fatal on Nov. 6, 2023, giving more time to lenders, third-party originators, and software partners/Technology Solution Providers (TSPs) to analyze and resolve problematic data.</li> </ul>

		<p>All edits for both subset Phases 3A and 3B are available for testing in the UCD Collection Solution. The UCD Submission and Findings report has been updated in Fannie Mae Connect with the respective fatal date for UCD Phase 3A and 3B edits.</p> <p>See the Phase 3 Edits tab in the <a href="#">UCD Feedback Messages</a> document for a list of the UCD Phase 3 edits. Please refer to the <a href="#">UCD Critical Edits Transition Resources</a> page for additional resources.</p> <p><b>NOTE:</b> <i>A few edits moved to Phase 3B to further align edits between the GSEs; refer to the Revision Log tabs in the Joint GSE UCD Phase 3 Critical Edits Feedback Message Mapping Document and the UCD Critical Edits Matrix for details.</i></p>

March 24	UCD Production Environment Cloud Migration	<p>The UCD Collection Solution will be migrating back-end services to the cloud. The UI will have slight variations to the color scheme and look and feel of the application.</p>
March 10	UCD Test Environment Cloud Migration	<p>In the UCD Test Environment (UCD CLVE), there will be an update to the processing of files that contain Desktop Underwriter (DU) Casefile IDs.</p> <p>Currently in the UCD Test Environment, only files that are submitted with a DU Casefile ID obtained from the test DU environment would result in a Successful UCD submission. All other files that contain a DU Casefile ID would result in a fatal edit message and a Not Successful submission status.</p> <p>With the UCD Test Environment migration to the cloud on March 10, the UCD test environment will ignore the Casefile ID (with an AUStype of ‘DesktopUnderwriter’) and will proceed with processing.</p> <p><b>NOTE:</b> <i>For submissions with a casefile obtained from test DU environment, the UCD test environment will no longer display the matching DU data as part of the UCD findings. New warning message 2050 will notify users that the DU matched was not performed. Edit 2050 message: The UCD Test Environment does not match Casefile IDs to any DU environment. The UCD submission was processed without DU matching.</i></p>

February 27	New Data Point – Qualified Mortgage Short Reset ARM APR Percent	<p>Fannie Mae will implement warning-to-fatal severity edits for the new data point ‘gse:QualifiedMortgageShortResetARM_APRPercent’ on February 27, 2023, for all Adjustable-Rate Mortgages (ARMs) that meet the definition below.</p> <p>For all ARMs, lenders must use the loan amount over the loan term to calculate periodic payments of principal and interest. The Revised Qualified Mortgage (QM) Rules Annual Percentage Rate (APR) and Average Prime Offer Rate (APOR) threshold test adds an APR data requirement for adjustable-rate QM loans that have an interest rate change within the first five years. The lender must use the maximum interest rate that could apply during the first five years after the first payment is due when calculating the qualifying rate; e.g.:</p> <ul style="list-style-type: none"><li>• 3/6 ARM: Note rate plus lifetime cap</li><li>• 5/6 ARM: Note rate plus first rate change cap</li></ul> <p>Each GSE’s UCD collection solution can accept this data point at any time. The edits will transition to fatal severity on May 1, 2023. See the UCD Phase 3 <a href="#">Critical Edits Matrix</a> and the <a href="#">UCD Feedback Messages</a> document for more information.</p>
