New and updated DU Spec resources supporting the redesigned Form 1003
January 17, 2019

As we move closer to finalization of the Desktop Underwriter® (DU®) Specification (DU Spec) supporting the redesigned Uniform Residential Loan Application (Form 1003), we continue to add to the toolbox of available resources supporting integration. We also have reorganized and renamed some existing content to better reflect the nature of these resources and how they are to be used, and grouped some related files to make them easier to find.

Below is the list of updated and new files:

- **UPDATED**

    - DU Implementation Guide MISMO V. 3.4

    - DU Specification MISMO V. 3.4 Test Case Suite – This zip file, available on our Technology Integration page, contains two new test cases. The two test cases previously located in this folder now can be found in a new file named *ULAD Mapping Test Cases* on our URLA page.

- **NEW / MOVED**

    - ULAD Mapping Test Cases – This file, available on our URLA page, contains the purchase and refinance test cases (including a narrative, XML file, and completed Form 1003 for each) that were previously found in the *DU Specification MISMO V3.4 Test Case Suite.* We moved these files because they provide better support for the redesigned Form 1003 mapping than the DU Specification implementation.

    - Fannie Mae DU Wrapper – This file, on our Technology Integration page, contains a new DU Wrapper file, the existing DU_ExtensionV3_4(1).xsd, and the GSE Schema Extensions.xsd, which has been moved here from the *ULAD Data Extensions to MISMO V. 3.4* link on the URLA page.

To access these documents and more information on the redesigned Form 1003 visit our URLA page. For integration-related information, visit our Technology Integration page. To see upcoming milestones for the redesigned Form 1003 and updated DU Spec, view the URLA Implementation Timeline.
