

EarlyCheck Integration Impact Memo

EarlyCheck ULAD MISMO 3.4

Dear Integration Partner:

The EarlyCheck™ Integration environment now accepts the ULAD MISMO 3.4 through XIS.

Key takeaways:

- Directly integrated customers can now begin testing their ULAD files in EarlyCheck. Customers should be able to receive EarlyCheck Loan Level Results in HTML only (No XML) with Summary Data and no edits.
- The EarlyCheck integration environment also includes the enhancements for EarlyCheck release v5.8. The updates in this release will apply to loans submitted to EarlyCheck via the User Interface and Direct Integration and will be implemented in production during the weekend of Feb. 23.

Please Review the [MISMO 3.4](#) supporting documents and [Release Notes](#) before testing your integrated system(s) to ensure your system(s) will be prepared to support this release.
