

# Loan Quality Connect™

Connecting Fannie Mae and our lenders in an ongoing partnership to drive loan quality.

Loan Quality Connect is an interactive loan quality management system that lets you work faster and smarter. It is the hub for our collaboration.

Loan Quality Connect transforms how we work together — simplified technology replaced the Quality Assurance System and File Transfer Portal — but more importantly, it provides the tools to support seamless collaboration and drive increased certainty.

## Designed with you in mind.

We worked closely with lenders to develop a state-of-the-art system that delivers exactly what you need:

### Simplified Technology

One system for loan file submissions, status updates, and document management.

### Seamless Collaboration

Instant communication and document sharing.

### Increased Certainty

Self-serve reporting, loan quality feedback, and status updates — all in real time.

## Shattering industry standards with our Loan Quality Defect Notice.

**Exclusive to Fannie Mae:** Lenders have 15 days to correct significant defects before a resolution request is sent — work with us in real time and reduce the letter and rebuttal process.

## What are Loan Quality Connect users saying?

Love the new system!

Having a queue that displays information in real-time in the Lender Courtesy View has already saved me time.

It is very easy to use!
