BOOT CAMP

Fannie Mae®

Gear up for Boot Camp 2019!

Your best investment in risk management

SEATTLE
JUNE 5 & 6

CHICAGO
JUNE 25 & 26

REGISTER!

You must receive an invitation to register. If you do not receive an invitation, please contact your Fannie Mae account team or email the **Boot Camp Mailbox**. Provide the name of your organization and Fannie Mae seller/servicer number, and the names and email addresses of individuals to be invited.

$599 includes training, breakfast, and lunch each day.

> *I would recommend the Boot Camp to anyone in the mortgage business. It was spot on.*

LEARN!

Featuring hot topics and essential information related to quality control, underwriting, and condo project standards, this event focuses on leveraging our policies, technologies, and resources to mitigate risk and enhance loan quality.

Review QC basics, prefunding requirements, third-party risk management, and more in the **Quality Control** track.

Explore selling and collateral policies, self-employed borrowers, Day 1 Certainty®, and our most frequently asked questions in the **Underwriting** track.

Focus on condo-specific QC requirements, process enhancements, and insurance – not to mention a live Q&A session – in the **Condo Project Standards** track.

NETWORK!

Boot Camp is **the** destination to network with industry peers, make valuable connections, and interact with the Fannie Mae team. Make the most of your Boot Camp experience at the Resource Center, where you can dig deeper on underwriting, technology solutions, and more.

WHO SHOULD ATTEND?

The Quality Control and Underwriting tracks are perfect learning opportunities for mid-level to senior managers with significant responsibility for an organizational QC program or with five or more years' experience in underwriting. The Condo Project Standards track is designed for junior to intermediate staff responsible for underwriting condo projects.

The curriculum includes new and updated information and is beneficial for both previous and new participants. Servicing will not be covered.
