

# Change to PE - Whole Loan Browse Price screen

## Integration Impact Memo

July 29, 2022

We are making a change to the Browse Price screen in Pricing & Execution - Whole Loan® (PE - Whole Loan®) to ensure all priced rates are displayed on one screen. The B2B Browse Price functionality will be impacted as well. The number of available rows will no longer be restricted to 25 rows per product grid and the number of pricing rows returned may vary by product. **These changes are now available in our test environment.**

Please use the following endpoints for testing:

- Browse Price: <https://api-clve.fanniemae.com/soap/BrowsePriceB2BService>
- Commitment: <https://api-clve.fanniemae.com/soap/CommitmentB2BService>

We anticipate this change will be available in production in 4-6 weeks, based on lender feedback, and will communicate the exact date two weeks in advance.

Please send feedback and questions to the [PE - Whole Loan Integration](#) team.
