The comparables contain 3 bedrooms and were built in approximately the same time period, offering similar overall utility. No time adjustments were warranted as there has been no recent measurable change in market prices. Most emphasis is placed on comparables 4 and 5, which although located further away are still within the subject’s market area.

Revision History		
Revision Date	URAR Section	Description
03/15/2024	Sales Comparison Approach	The comparables provided from the borrower-initiated ROV were reviewed and considered. Two sales were deemed reliable and put in the sales grid, which increased the Indicated Value by Sales Comparison Approach. One was deemed less reliable and added to Additional Properties Analyzed Not Used.
03/15/2024	Reconciliation	Due to the increase in Indicated Value by Sales Comparison Approach, the Opinion of Value changed.

Reconsideration of Value			
Type	Borrower-Initiated	Result	Value Change
Date	03/15/2024		

Reconsideration of Value Commentary The borrower provided 3 sales which were not in Hilltop Hills but were within the market area. After analyzing the sales provided and adding comps 4 and 5 to the sales grid, there was support for a change in value.

This appraisal report is subject to the following scope of work, intended use, intended user, definition of market value, statement of assumptions and limiting conditions, and certifications. Modifications, additions, or deletions to the definition of market value or assumptions and limiting conditions are not permitted. The appraiser may expand the scope of work to include any additional research or analysis necessary based on the complexity of this appraisal assignment. Modifications or deletions to Intended Use, Intended User, and the certifications are also not permitted. However, additional Intended Use, Intended User, and certifications that do not constitute material alterations to this appraisal report, such as those required by law or those related to the appraiser’s continuing education or membership in an appraisal organization, are permitted.

Scope of Work

The scope of work for this assignment is based on the applicable assignment elements, including: the client and any other intended users, the intended use, the definition of market value that follows, the effective date, the subject property and its relevant characteristics, and the applicable assignment conditions. The appraiser must, at a minimum: (1) obtain and review adequate and reliable information for the subject property; (2) research, verify, and analyze adequate and reliable data for the subject market area including data for each comparable property reported; and (3) report his or her analyses, opinions, and conclusions in this appraisal report.

Intended Use

The intended use of the opinions and conclusions contained in this appraisal report is for the intended user to evaluate the property that is the subject of this appraisal for a mortgage finance transaction or related activities.

Intended User

The intended user of this report is the lender/client.

Definition of Market Value

The most probable price that a property should bring in a competitive and open market under all conditions requisite to a fair sale with the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he or she considers his or her own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

*Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for costs that are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable because the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third-party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar-for-dollar cost of the financing or concession, but the dollar amount of any adjustment should approximate the market’s reaction to the financing or concessions based on the appraiser’s judgment.

Statement of Assumptions and Limiting Conditions

The appraiser assumes that the title is good and marketable unless he or she becomes aware of information to the contrary.

If the appraiser has included a sketch or floor plan in this appraisal report, it shows the approximate dimensions and is included only to assist the reader in visualizing the property and understanding the appraiser’s determination of its size.

The appraiser has relied on data provided by third parties in this appraisal report. Such data may include, but is not limited to, floor plans, flood maps, multiple listing real estate services, tax assessment records, public land records, satellite imagery, virtual street views, property data services, surveys, engineering reports, and property data aggregations. After examination of the data and data sources, the appraiser has used only the data he or she considers reliable. The appraiser assumes there are no material omissions in the data relied upon and makes no guarantees, express or implied, regarding their accuracy. If the source date is prior to the effective date of the appraisal, the appraiser assumes the property characteristics and supporting information have not changed in the interim.

The appraiser will not be required to give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

The appraiser has noted in this appraisal report any adverse conditions (such as needed repairs, deterioration, the presence of hazardous wastes, toxic substances, etc.) that the appraiser became aware of during the development of this appraisal. Unless otherwise stated in this appraisal report, the appraiser has no knowledge of any hidden or unapparent physical deficiencies or adverse conditions of the property (such as, but not limited to, needed repairs, deterioration, the presence of hazardous wastes, toxic substances, adverse environmental conditions, etc.) that would make the property less valuable, and assumes that there are no such conditions and makes no guarantees or warranties, express or implied. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, this appraisal report must not be considered as an environmental assessment of the property.
