I. Introduction

In conjunction with the Uniform Closing Dataset (UCD) Specifications, the Government Sponsored Entities (GSEs) are providing five sample use cases that deal with standard types of loan transactions delivered to the GSEs. They are:

- Fixed Rate Loans
- Adjustable Rate (ARM) loans
- Purchase Transactions
- Refinance Transactions
- Construction Loans

In addition to these transactions, each use case will have some unique qualities that can assist in developing UCD files that will pass all Critical Edits published by the GSEs. The Use Cases will be provided in UCD V2.0 Sample CDs - each of which will have Closing Disclosure samples in addition to narratives describing the aspects of the transaction. In addition to the Use Cases, a Use Case Matrix in Excel format which will summarize the aspects of each Use Case.

Also provided by the GSEs are the UCD 2.0 Sample XML Files which are sample eXtensible Markup Language (XML) files that can be used as a guideline in delivering UCD XML files to the GSEs. The data in these files is in sync with each respective Use Case.

No Escrow		
Estimated Property Costs over Year 1	18.6	Estimated total amount over year 1. You must pay these costs directly, possibly in one or two large payments a year.
Escrow Waiver Fee	18.7	

In the future,

Your property costs may change and, as a result, your escrow payment may change. You may be able to cancel your escrow account, but if you do, you must pay your property costs directly. If you fail to pay your property taxes, your state or local government may (1) impose fines and penalties or (2) place a tax lien on this property. If you fail to pay any of your property costs, your lender may (1) add the amounts to your loan balance, (2) add an escrow account to your loan, or (3) require you to pay for property insurance that the lender buys on your behalf, which likely would cost more and provide fewer benefits than what you could buy on your own.
